

# Delaware Amateur Radio Emergency Frequencies Reference Sheet

**EFFECTIVE 28 JANUARY 2022**

This document provides an overview to assist in achieving interoperability between Amateur Radio emergency communications teams. Refer to New Castle, Kent, and Sussex County Emergency Reference Sheets for detailed county and local information.

**NOTE:** Program your radios to include a separate simplex channel/position for the OUTPUT frequency and PL tone of your primary EMCOMM repeater. This will be very helpful when repeaters fail. It will quickly put everyone on a simplex frequency until the repeater is restored or until your Emergency Coordinator directs operations to an alternate repeater.

## STATEWIDE EMERGENCY FREQUENCIES

Delaware Statewide Emergency Net (HF): Primary 3.904\* LSB, Alternate 7.280 LSB  
 Delaware Statewide Simplex (Expect to use voice relay) (VHF) 146.550

**GUIDELINES FOR EMERGENCY COMMUNICATIONS LEADERS**

1. Alert your team.
2. Establish your net.
3. Contact served agencies and offer help if sufficient staffing is available.
4. Make contact with the DEMA station on 3.904\* MHz/Alternate 7.280 MHz SSB.

\* Note: due to interference from an afternoon net on 3.907 MHz, during the winter months the DE Statewide Emergency Net is on 3.904 MHz; it will revert back to 3.905 when we return to EDST in March.
